

IN THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application.

- 131
1. (Original) A method of operating a gaming machine, comprising:
monitoring a number of wager inputs from players of said gaming machine; and
altering a visual motif of said gaming machine in response to said number being a certain value.
 2. (Original) The method of claim 1, wherein said step of monitoring includes monitoring wager inputs over a period of time and while a variety of different visual motifs are being displayed, and determining which of said variety of different visual motifs is a favorite motif, said favorite motif having a largest number of wager inputs as compared to other ones of said variety of visual different motifs, said certain value is said number of wager inputs, said altering includes displaying said favorite motif on said gaming machine.
 3. (Original) The method of claim 1, wherein said certain value is a fixed value such that said step of altering occurs at a constant frequency.
 4. (Original) The method of claim 3, wherein said certain value is every 25 plays of said gaming machine.

5. (Original) The method of claim 1, wherein said step of altering includes altering background visual elements.

6. (Original) The method of claim 5, wherein said background visual elements include a series of cyclical motifs, said step of altering includes consecutively switching between ones of said series of cyclical motifs.

7. (Original) The method of claim 6, wherein said series of cyclical motifs are motifs of the seasons of the year.

8. (Original) The method of claim 6, wherein said series of cyclical motifs are a day motif and a night motif.

9-16. (Withdrawn)

17. (Currently Amended) A method of operating a gaming machine, comprising:
storing a plurality of data sets for producing a plurality of different types of visual motifs
on a display of said gaming machine;
displaying a first one of said plurality of different types of visual motifs on a display of
said gaming machine in response to a wager input;
monitoring a number of wager inputs from players of said gaming machine;
discontinuing said displaying of said first one of said plurality of different types of visual
motifs based on the number of wager inputs; and
